PROFILE

I am applying for the Intern position at Artemis Digital with a proactive mindset and a strong desire to learn. I hope to contribute my youthful energy while gaining valuable knowledge from the experienced team at your company. I believe this is a valuable opportunity for me to grow personally and gain practical experience in a field I am passionate about.

PROJECT

Portfolio Website

link deploy

- Technologies: HTML, CSS, JavaScript
- Description:
- Designed and developed a responsive personal portfolio website to showcase my skills, projects, and background. The site includes several interactive features such as:
- Dark/Light Theme Toggle for user-friendly viewing experiences
- Smooth Scroll-to-Section navigation
- Image Carousel to highlight selected works or testimonials
- Scroll-to-Top Button for improved UX
- Popup Modals for detailed project previews

Homeverse Website

<https://homeverse-beige.vercel.app/>

- Technologies: HTML, CSS, JavaScript
- Description:
- Built a modern and responsive real estate website that showcases property listings and enhances user experience through interactive features. Key functionalities include:
- Auto-close Navbar when clicking on any navbar link for smoother navigation
- Toggle Navbar Event applied to all related elements for better interactivity
- Dynamic Header Styling with active state triggered when window.scrollY >= 400 to improve usability during scrolling
- This project highlights my front-end development skills and ability to implement interactive UI logic using JavaScript.
